Illinois Coalition for School Health Centers Annual Statewide Conference: Collaboration, Community, Commitment

Join the Illinois Coalition for School Health Centers and the Illinois Department of Human Services for the **School Health Center Statewide Conference: Collaboration, Community, Commitment**. This year's theme reflects the school health center community's leadership and commitment to improving the overall health and well-being of students in Illinois. School health centers are planned partnerships among schools, communities, providers, parents and students who engage in continuous dialogue to meet the health needs of the community's children and adolescents. This conference will provide these partners with resources and tools to improve student health in Illinois.

The conference aims to:

- Provide resources and facilitate discussions for new and developing school health centers
- Highlight the importance of youth in the steering and maintenance of the school health center model
- Build a strong coalition between health care providers, health advocates and the youth they serve
- Address current trends in child/adolescent health
- Increase collaboration between schools and school health centers
- Enrich and strengthen the skills of clinicians, administrators and allied staff in the school health center setting
- Provide both formal and informal opportunities for attendees to share ideas, information and experiences
- Promote and develop the school health center model through advocacy opportunities

The Illinois Coalition for School Health Centers (ICSHC) represents institutions and individuals who support, receive and provide health care in school health centers and school-linked programs. ICSHC is a project of the Illinois Maternal and Child Health Coalition, a seasoned advocacy organization in the state. ICSHC strives to improve the physical and mental health of children and adolescents in Illinois by fostering the development, stabilization and expansion of school health centers. ICSHC does this through:

- Education
- Advocacy
- Networking
- Professional and Program Development

This course is co-provided with Oakton Community College who will provide 4.5 CEUs each day for nursing, social work and dietitian professionals.

Oakton Community College, Alliance for Lifelong Learning, Continuing Education for Health Professionals is accredited as a provider of nursing continuing education by the American Nurses Credentialing Center's Commission on Accreditation.

Heidi Britton Dion, MPH
Project Coordinator, Urbana School Health Center
Tiffany Clarke, MPA
Program Associate, NASBHC
- Adjournment**

2:30 p.m.

Pre-Conference: School Health Centers 101

This session is especially designed for those who are new to the school health center community or who are looking for a refresher course on the school health center model. Attendees will have the opportunity to learn the nuts and bolts of developing this successful model of care. Experts in the field will present information on Illinois specific requirements, building an effective advisory board, understanding the state's consent and confidentiality laws and SHC marketing strategies for schools and communities. This session will give attendees the chance to network with other SHC professionals and hear success stories.

State Capitol Day: Advancing the SHC Agenda

ICSHC is currently working to reinstate new funding to the SHC program that was vetoed from the FY08 budget. Attendees will learn how to effectively communicate with state legislators about the value of SHCs and have the opportunity to meet with legislators directly and secure their support for new funding for the SHC program. Our elected leaders need to see how powerful and passionate SHC advocates are. Don't miss out on this opportunity to raise awareness about the model and to expand SHC funding!

Keynote Session: Strengthening Your School Health Center Through Youth and Adult Collaborations

This year's keynote presentation features the ICSHC's first ever Youth Advisory Council (YAC), along with Jonathan Stacks from the Illinois Caucus for Adolescent Health. A panel of YAC members will offer insightful strategies on how to market your SHC to students and also share how youth-adult partnerships strengthen your SHC's ability to provide youth-friendly health care services.
